PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology student with hands-on expertise in full-stack web and mobile application development. Proven track record in architecting responsive, database-driven systems incorporating role-based access control (RBAC), secure authentication, RESTful APIs, real-time geolocation, and interactive data analytics. Recognized as 3rd Place winner in the CICT Techno Day 2026 Frontend Web Development Competition. Passionate about leveraging technical problem-solving skills, modern frameworks, and agile collaboration to deliver scalable, user-centric software solutions.

TECHNICAL SKILLS

Programming Languages
- JavaScript
- TypeScript
- PHP
- Java
- C++
- HTML5
- CSS3

Database & Backend
- MySQL
- MongoDB
- REST API Development
- CRUD Operations

Web Development
- Frontend Development
- Backend Development
- Responsive Web Design
- Web Application Development

Hardware Configuration
- Sensor Integration
- Configure Computer Systems
- Setting Up Computer Networks
- Setting Up Computer Servers
- Repairing Computer Systems and Networks

Frameworks & Libraries
- Next.js
- React.js
- Node.js
- Vanilla.js
- Tailwind

AI & Automation Tools
- AI-Assisted Development
- Antigravity
- ChatGPT
- Claude
- GitHub Copilot

Productivity Tools
- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint

Development Tools
- Git
- GitHub
- Visual Studio Code
- Antigravity IDE
- Vercel
- Render
- Postman
- Cloudinary

EDUCATION

Nueva Ecija University of Science and Technology (NEUST) | Cabanatuan City, Nueva Ecija **2023 - 2027**

Bachelor of Science in Information Technology

College of Information and Communications Technology (CICT), Sumacab Campus

Major: Web System Development (**2025 - 2027**)

CERTIFICATIONS

Computer Systems Servicing NC II | TESDA **2023**

Core Competencies: Computer System Installation & Configuration | Computer Networking | Server Setup | Computer System & Network Maintenance and Repair

ACADEMIC & TECHNICAL PROJECTS

Community Incident Reporting and Geolocation-Driven Emergency Response System | Capstone Project **2026**

- Developed a cross-platform municipal rescue web system using React, Node.js, MongoDB, Tailwind CSS, and REST APIs.
- Implemented role-based workflows for 4 user groups, including incident reporting, tracking, geolocation, photo submission, notifications, assignments, and operational dashboards.
- Designed and integrated database-driven features to support incident management and emergency response operations.
- Collaborated in a 4-member development team on requirements analysis, system design, testing, documentation, and improvements.

Personalized Student Budget Tracker with Data Visualization and Analytics | Mobile Application Commission Project **2025 – 2026**

- Built an Ionic Angular and TypeScript mobile application for managing allowances, income, expenses, savings, categories, and transaction history.
- Implemented need-versus-want classification, dashboard visualizations, and LocalStorage data persistence.
- Developed reporting features covering monthly, quarterly, semi-annual, yearly, and custom date ranges.

ACHIEVEMENTS

3rd Place - Frontend Web Development Competition, CICT Techno Day 2026, NEUST **March 25, 2026**

PROFESSIONAL SKILLS

Problem Solving | Debugging | Collaboration | Remote Teamwork | Time Management | Adaptability
